Card Inspection Report

Example inspection - supplied card scans

Prepared 28 Sept 2026, 12:36 am

CONDITION ESTIMATE

Not measured

Surface is not assessed.

An image measurement needs review; a combined estimate is not available.

FRONT

Not measured

Centering: left / right	**Not measured**
Centering: top / bottom	**Not measured**
Corner score	**Not measured**
Edge score	**Not measured**
Surface	**Not assessed**

1 operator observation

BACK

Side estimate: Near Mint+ · 8.9 / 10

Centering: left / right	**50/50**
Centering: top / bottom	**43/57**
Corner score	**7.7 / 10**
Edge score	**9.6 / 10**
Surface	**Not assessed**

1 operator observation

Read the image, then the measurements.

Centering compares opposite borders; 50/50 is even. Corner and edge scores are image-based aids. Numbered markers link to operator observations. Inspect the physical card under suitable lighting.

Observations

Numbered markers match the card images on page 1.

FRONT

Boundary needs review

All four card edges could not be verified. Use a clearer background or adjust the scan.

#1 Review area

Demonstration observation: inspect this area under angled light. This marker is an example, not a finding of damage.

BACK

#2 Edge check

Demonstration observation: compare the printed border with the physical edge. Confirm the condition in person.

Operator record

Checklist records operator actions, not condition or a grade.

Not checked: Front corners
Not checked: Front edges
Not checked: Back corners
Not checked: Back edges
Not checked: Surface in two views
Not checked: Centering
Not checked: Both sides reviewed
